

## National Violent Death Reporting System (NVDRS) 2016 Surveillance Summary Supplemental Tables

The National Violent Death Reporting System (NVDRS) is a state-based active surveillance system that collects data on the characteristics and circumstances associated with violence-related deaths in participating states. NVDRS data are used to monitor the occurrence of violence-related fatal injuries and assist public health authorities in the development, implementation, and evaluation of programs and policies to reduce and prevent violent deaths.

NVDRS collects data on the following types of violent deaths: homicides, suicides, legal intervention deaths\* (i.e., deaths caused by law enforcement acting in the line of duty and other persons with legal authority to use deadly force but excluding legal executions). NVDRS also collects data on unintentional firearm deaths and deaths of undetermined intent in which there was a possibility that force was used to inflict the fatal injury. NVDRS defines a violent death as a death resulting from the intentional use of physical force or power, threatened or actual, against oneself, another person, or a group or community. The system compiles information from three primary data sources: 1) death certificates, 2) coroner/medical examiner reports, and 3) law enforcement reports, and links deaths that are related (e.g., multiple homicides, a homicide followed by a suicide, or multiple suicides) into a single incident. NVDRS has the capacity to collect over 600 unique variables for each death. (*\*The term legal intervention is a classification from ICD-10 (Y-35.0) and does not denote the lawfulness or legality of the circumstances surrounding the death.*)

The following tables provide information to supplement the data presented in the 2016 NVDRS Surveillance Summary, available at [<LINK TO MMWR SITE HERE>](#). These tables provide information that was not presented or was not discussed in detail within the 2016 NVDRS Surveillance Summary, but which has been presented in previous NVDRS Surveillance Summaries and may therefore provide useful information for readers who would like further information related to specific manners of violent death or details regarding the circumstances or characteristics surrounding these deaths. The following tables include data on types of violent incidents and additional information on methods used and location in which injury occurred, data on deaths of undetermined intent, additional crime information associated with homicides and legal intervention deaths, types of recent crises experienced by suicide and homicide decedents, and toxicology results for homicide, deaths of undetermined intent, and legal intervention decedents.

For more detailed information about NVDRS and more 2016 NVDRS data, please see the 2016 NVDRS Surveillance Summary, at: [<LINK TO MMWR SITE HERE>](#).

**Table S1. Number\*, percentage<sup>†</sup>, and rate<sup>§</sup> of deaths by incident type and manner of death -- National Violent Death Reporting System, 32 states,<sup>¶</sup> 2016**

Characteristic	No. (%)	Rate
<b>Incident Type</b>		
Suicide, single	25,399 (62.9)	15.4
Homicide, single	8,887 (22.0)	4.7
Undetermined intent, single	4,424 (11.0)	2.4
Unintentional firearm, single	293 (<1.0)	0.2
Suicide, multiple	29 (<1.0)	**
Homicide, multiple	424 (1.1)	**
Undetermined intent, multiple	12 (<1.0)	**
Legal intervention <sup>††</sup> , single/multiple	510 (1.3)	**
Homicide followed by suicide	381 (<1.0)	**
Other combinations of deaths	15 (<1.0)	**
<b>Total</b>	<b>40,374 (100)</b>	<b>**</b>
<b>Manner of death</b>		
Suicide, or intentional self-harm	25,850 (62.3)	15.7
Homicide	10,336 (24.9)	5.5
Undetermined intent	4,470 (10.8)	2.4
Legal Intervention	515 (1.2)	0.3
Unintentional firearm	295 (<1.0)	0.2
<b>Total</b>	<b>41,466 (100)</b>	<b>§§</b>

\*No. incidents=40,374; no. decedents=41,017 (98.9%); no. suspect/decedents=449 (1.1%). The Incident Type section reports number of incidents; the manner of death section reports number of deaths.

<sup>†</sup>Percentages might not total 100% due to rounding.

<sup>§</sup>Per 100,000 population.

<sup>¶</sup>Alaska, Arizona, Colorado, Connecticut, Georgia, Hawaii, Indiana, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Utah, Vermont, Virginia, Washington, Wisconsin. Illinois, Pennsylvania, and Washington collect data on 80% or more of violent deaths in state, in accordance with requirements under which the state was funded. Denominators for the rates for these three states represent only the populations of the counties from which the data is collected.

\*\*Because the number of decedents varies in incidents involving multiple deaths, numerators cannot be determined to compute rates.

<sup>††</sup>The term legal intervention does not denote the lawfulness or legality of the circumstances surrounding the death.

<sup>§§</sup>Total rates could not be computed because denominators vary by manner of death. Suicide uses population ≥10 years of age and all other manners use the total population.

**Table S2. Number\* and percentage<sup>†</sup> of deaths by method used and location in which injury occurred -- National Violent Death Reporting System, 32 states,<sup>§</sup> 2016**

Characteristic	No. (%)
<b>Method</b>	
Firearm	21,311 (51.4)

**Table S4. Number\* and percentage<sup>†</sup> of deaths of undetermined intent, by precipitating circumstances and decedent's sex -- National Violent Death Reporting System, 32 states,<sup>§</sup> 2016**

	Male	Female	Total
Precipitating circumstances	No. (%)	No. (%)	No. (%)

\*Includes deaths of undetermined intent with one or more precipitating circumstances. More than one circumstance could have been present per decedent.

<sup>†</sup>Denominator includes those deaths of undetermined intent with one or more precipitating circumstances. The sum of percentages in columns exceeds 100% because more than one circumstance could have been present per decedent.

<sup>§</sup>Alaska, Arizona, Colorado, Connecticut, Georgia, Hawaii, Indiana, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Utah, Vermont, Virginia, Washington, Wisconsin. Illinois, Pennsylvania, and Washington collect data on 80% or more of violent deaths in state, in accordance with requirements under which the state was funded.

<sup>¶</sup>Circumstances were unknown for 644 decedents (437 males, 206 females, 1 unknown). Total No. of deaths of undetermined intent= 4,470 (2,928 males, 1,541 females and 1 unknown).

\*\*Includes decedents with one or more diagnosed current mental health problems, therefore sums of percentages for the diagnosed conditions exceed 100%. Denominator in percentages is the number of decedents with one or more current diagnosed mental health problems.

<sup>††</sup>Denominator includes those decedents involved in an incident that was precipitated by another crime.

<sup>§§</sup>Denominator is decedents who disclosed intent.

**Table S5. Number\* and percentage of deaths of undetermined intent that were tested for alcohol and drugs whose results were positive,<sup>†</sup> by toxicology variable -- National Violent Death Reporting System, 32 states,<sup>§</sup> 2016**

<b>Toxicology variable</b>	<b>Tested No. (%)</b>	<b>Positive No. (%)</b>
BAC <sup>†</sup>	3,355 (75.1)	1,313 (39.1)
Alcohol < 0.08 g/dL		451 (34.3)
Alcohol >= 0.08 g/dL		706 (53.8)
Alcohol positive - level unknown		156 (11.9)
Amphetamines	1,655 (37.0)	348 (21.0)
Anticonvulsants	1,274 (28.5)	341 (26.8)
Antidepressants	1,792 (40.1)	972 (54.2)
Antipsychotics	1,323 (29.6)	226 (17.1)
Barbiturates	1,451 (32.5)	40 (2.8)
Benzodiazepines	1,995 (44.6)	995 (49.9)
Carbon monoxide	622 (13.9)	87 (14.0)
Cocaine	2,151 (48.1)	781 (36.3)
Marijuana	1,430 (32.0)	386 (27.0)
Muscle relaxants	1,227 (27.4)	182 (14.8)
Opioids	3,458 (77.4)	2,738 (79.2)
Other drugs/substances**	2,287 (51.2)	2,117 (92.6)

**Abbreviation:** BAC = blood alcohol concentration.

\*No. of decedents of undetermined intent=4,470.

<sup>†</sup>Percentage is of decedents tested for toxicology variable.

<sup>§</sup>Alaska, Arizona, Colorado, Connecticut, Georgia, Hawaii, Indiana, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Utah, Vermont, Virginia, Washington, Wisconsin. Illinois, Pennsylvania, and Washington collect data on 80% or more of violent deaths in state, in accordance with requirements under which the state was funded.

<sup>†</sup>BAC of >=0.08 g/dL is over the legal limit for impaired driving.

\*\*Other drugs/substances indicated if any results were positive; levels for these drugs/substances are not measured.

**Table S6. Number\* and percentage of homicide decedents that were tested for alcohol and drugs whose results were positive,<sup>†</sup> by toxicology variable -- National Violent Death Reporting System, 32 states,<sup>§</sup> 2016**

<b>Toxicology variable</b>	<b>Tested No. (%)</b>	<b>Positive No. (%)</b>
BAC <sup>¶</sup>	6,512 (63.0)	2,395 (36.8)
Alcohol < 0.08 g/dL		902 (37.7)
Alcohol >= 0.08 g/dL		1,367 (57.1)
Alcohol positive - level unknown		126 (5.3)
Amphetamines	4,037 (39.1)	709 (17.6)
Anticonvulsants	1,878 (18.2)	133 (7.1)
Antidepressants	2,173 (21.0)	197 (9.1)
Antipsychotics	2,099 (20.3)	31 (1.5)
Barbiturates	3,312 (32.0)	49 (1.5)
Benzodiazepines	3,876 (37.5)	599 (15.5)
Carbon monoxide	855 (8.3)	129 (15.1)
Cocaine	4,991 (48.3)	778 (15.6)
Marijuana	3,914 (37.9)	2,034 (52.0)
Muscle relaxants	2,205 (21.3)	35 (1.6)
Opioids	5,127 (49.6)	1,037 (20.2)
Other drugs/substances**	1,956 (18.9)	1,530 (78.2)

**Abbreviation:** BAC = blood alcohol concentration.

\*No. of homicide decedents=10,336.

<sup>†</sup>Percentage is of decedents tested for toxicology variable.

<sup>§</sup>Alaska, Arizona, Colorado, Connecticut, Georgia, Hawaii, Indiana, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Utah, Vermont, Virginia, Washington, Wisconsin. Illinois, Pennsylvania, and Washington collect data on 80% or more of violent deaths in state, in accordance with requirements under which the state was funded.

<sup>¶</sup>BAC of >=0.08 g/dL is over the legal limit for impaired driving.

\*\*Other drugs/substances indicated if any results were positive; levels for these drugs/substances are not measured.

**Table S7. Number\* and percentage<sup>†</sup> of homicides precipitated by another crime, by type of crime - National Violent Death Reporting System, 32 states<sup>§</sup>, 2016**

<b>Crime Type</b>	<b>No. (%)</b>
<b>Precipitated by another crime</b>	<b>2,538 (100.0)</b>
Assault, homicide	1,111 (43.8)
Robbery	879 (34.6)
Drug trade	317 (12.5)
Burglary	303 (11.9)
Motor vehicle theft	87 (3.4)
Rape, sexual assault	62 (2.4)
Arson	56 (2.2)
Gambling	20 (<1.0)
Witness intimidation/elimination	17 (<1.0)
Other crime	199 (7.8)
Unknown	44 (1.7)

\*Includes deaths precipitated by another crime. Number will not equal the sum of the column because a death could have been precipitated by more than one other crime.

<sup>†</sup>Denominator includes those decedents involved in an incident that was precipitated by another crime. Percentages do not sum to 100% because a decedent could have experienced more than one crime.

<sup>§</sup>Alaska, Arizona, Colorado, Connecticut, Georgia, Hawaii, Indiana, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Utah, Vermont, Virginia, Washington, Wisconsin. Illinois, Pennsylvania, and Washington collect data on 80% or more of violent deaths in state, in accordance with requirements under which the state was funded.

**Table S8. Number\* and percentage of legal intervention<sup>†</sup> deaths that were tested for alcohol and drugs whose results were positive,<sup>§</sup> by toxicology variable -- National Violent Death Reporting System, 32 states,<sup>¶</sup> 2016**

<b>Toxicology variable</b>	<b>Tested No. (%)</b>	<b>Positive No. (%)</b>
BAC**	372 (72.2)	163 (43.8)
Alcohol < 0.08 g/dL		41 (25.2)
Alcohol >= 0.08 g/dL		113 (69.3)
Alcohol positive - level unknown		9 (5.5)
